

**2011 WIN Region IV Conference
"It's the Climb"
Achieving Satisfaction in the Workplace
Hosted by Idaho Women in Nuclear**

July 20-22, 2011
The Shilo Inn Convention Center
780 Lindsay Blvd
Idaho Falls, Idaho.

This year's conference will be held at Idaho National Laboratory (INL) in Idaho Falls, Idaho. INL leads nuclear energy research for the U.S. Department of Energy and collaborates with government, universities and industry to deliver energy and national security solutions and expand the frontiers of science and technology.

Join us for Thursday's tour of INL facilities which will feature tours of the Advanced Test Reactor, Materials and Fuels Complex and national historic landmark EBR-1.

Friday, July 22

Shilo Inn Grand Teton Room

8:00 a.m.-5:00 p.m.- Featured speakers followed by business meeting

Women in nuclear is a premier network of men and women in nuclear- and radiation-related fields. The organization is focused on increasing awareness of the public, and women in particular, of the benefits of various nuclear applications and safety.

This year's theme, *It's the Climb*, seeks to draw attention to issues related to the advancement of women in key positions within the nuclear industry as well as to provide an environment which supports leadership development in women and network building with other professionals in the field. It is an opportunity for women interested in the field of nuclear applications to learn, share ideas and experiences, and discuss new technology, trends, and concerns related to the future of nuclear in the United States

Registration Fee: \$53
